PREHISTORIC ISLE

**The island is filled
with mystery
& danger.**

Around 1930, ships that sailed around the Bahama Islands suddenly disappeared without reason. The United States and other neighboring countries found the situation serious and decided to send the U.S. Marine Investigation Team to the point where most of the accidents occurred. This point was "Hell Island". When the team landed on the island, they found the plants in the forest to be from the prehistoric age of over 100 million years ago. Dinosaurs, which were thought to be extinct, appeared one after another to attack the investigators.

PREHISTORIC ISLE

Shooting Button

Option Item

WITHOUT OPTION → GUN FIRES FORWARD.

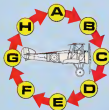

WITH OPTION → GUN FIRES FORWARD.

**+
